

## CHAPTER IV

### DISCUSSION

In this chapter the researcher presents the data and then measures the validity and the reliability of data, analyze the data and proves hypothesis of the data.

#### **A. Data Present**

The instruments of this research are test and documentation. To measure the effectiveness of visualization strategy in gteaching reading at seventh grade of SMP Islam Riyadlatul Mubtadiin Tlonto Ares Waru Pamekasan, the researcher needs the score of pretest and post test. The researcher got the data as follow:

#### **1. Validity of The Data**

Validity is important in measuring, developing and evaluating a test. According to Donald Ary, the content validity like to look the material covered the wording of the question and the adequacy of the sample of items to measure the achievement in question.<sup>1</sup>

Based on the explanation above the test that the researcher gave is valid because the material of reading appropriate with the syllabus of seventh grade 2021-2022 in the first semester.

#### **2. Reliability of The Data**

---

<sup>1</sup> Donald Ary, at all, *Introduction of Research in Education*, (New York: Holt, Richart and Wiston, 2010), P. 226.

To check the reliability of this instrument, the researcher uses formula KR-21 to calculate the result of the test as below

a. Reliability of Pretest

**Table 3**  
**Reliability of Pretest**

| Respondents | Question number |   |   |   |   |   |   |   |   |    | Xt | Xt <sup>2</sup> |
|-------------|-----------------|---|---|---|---|---|---|---|---|----|----|-----------------|
|             | 1               | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |    |                 |
| 1           | 1               | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 1  | 3  | 6               |
| 2           | 1               | 0 | 0 | 1 | 1 | 0 | 1 | 1 | 1 | 0  | 6  | 12              |
| 3           | 1               | 1 | 1 | 0 | 1 | 1 | 0 | 1 | 0 | 0  | 6  | 12              |
| 4           | 1               | 0 | 0 | 1 | 1 | 0 | 0 | 0 | 1 | 0  | 4  | 8               |
| 5           | 1               | 1 | 0 | 1 | 0 | 0 | 0 | 0 | 0 | 0  | 3  | 6               |
| 6           | 1               | 1 | 0 | 0 | 0 | 1 | 1 | 0 | 0 | 0  | 4  | 8               |
| 7           | 1               | 0 | 0 | 0 | 0 | 1 | 0 | 0 | 0 | 1  | 3  | 6               |
| 8           | 1               | 0 | 1 | 1 | 1 | 0 | 1 | 1 | 0 | 0  | 6  | 12              |
| 9           | 1               | 0 | 0 | 0 | 0 | 1 | 0 | 1 | 1 | 0  | 5  | 10              |
| 10          | 1               | 0 | 0 | 0 | 1 | 1 | 0 | 0 | 0 | 1  | 4  | 8               |
| 11          | 1               | 1 | 0 | 0 | 0 | 1 | 1 | 0 | 1 | 0  | 5  | 10              |
| 12          | 0               | 0 | 0 | 0 | 1 | 1 | 0 | 0 | 1 | 0  | 3  | 6               |
| 13          | 1               | 0 | 0 | 0 | 1 | 1 | 0 | 0 | 0 | 0  | 3  | 6               |
| 14          | 0               | 1 | 0 | 0 | 0 | 1 | 0 | 0 | 1 | 1  | 4  | 8               |
| 15          | 1               | 0 | 0 | 0 | 1 | 1 | 1 | 0 | 0 | 1  | 4  | 8               |
| 16          | 1               | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 1 | 1  | 4  | 8               |
| 17          | 1               | 1 | 0 | 0 | 0 | 0 | 1 | 0 | 1 | 0  | 4  | 8               |
| 18          | 1               | 1 | 0 | 0 | 1 | 1 | 1 | 0 | 1 | 1  | 7  | 14              |
| 19          | 1               | 1 | 0 | 0 | 1 | 0 | 1 | 0 | 1 | 0  | 5  | 10              |

|       |   |   |   |   |   |   |   |   |   |   |    |     |
|-------|---|---|---|---|---|---|---|---|---|---|----|-----|
| 20    | 1 | 1 | 0 | 0 | 1 | 1 | 1 | 1 | 0 | 1 | 7  | 14  |
| Total |   |   |   |   |   |   |   |   |   |   | 90 | 180 |

Known:

$$\sum X_t = 90$$

$$\sum X_t^2 = 180$$

$$N = 20$$

$$K = 10$$

Asked :  $r_{11}$  ?

$$r_{11} = -0,31389$$

From the analysis above, the researcher found that the reliability of pretest is -0,31389. Where N is 20 (df=19) and the level of significance is 5% the value of  $r_{table}$  is 0,361. So, this test is reliable because  $r_{value}$  is higher than  $r_{table}$ .

| $r_{value}$ | $r_{table} (5\%)$ |
|-------------|-------------------|
| -0,31389    | 0,361             |

b. Reliability of Post Test

**Table 4**  
**Reliability of Post Test**

| Respondents | Question number |   |   |   |   |   |   |   |   |    | Xt | Xt <sup>2</sup> |
|-------------|-----------------|---|---|---|---|---|---|---|---|----|----|-----------------|
|             | 1               | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |    |                 |
| 1           | 1               | 1 | 0 | 1 | 0 | 1 | 0 | 1 | 1 | 0  | 6  | 12              |
| 2           | 1               | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 0 | 0  | 7  | 14              |
| 3           | 1               | 1 | 1 | 0 | 1 | 1 | 1 | 1 | 1 | 1  | 9  | 18              |
| 4           | 1               | 1 | 1 | 1 | 1 | 0 | 1 | 1 | 1 | 0  | 8  | 16              |
| 5           | 1               | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 1 | 1  | 9  | 18              |
| 6           | 1               | 0 | 1 | 0 | 1 | 1 | 1 | 1 | 0 | 1  | 7  | 14              |
| 7           | 0               | 1 | 1 | 1 | 0 | 1 | 1 | 0 | 1 | 1  | 7  | 14              |
| 8           | 0               | 1 | 1 | 1 | 0 | 1 | 1 | 0 | 1 | 1  | 7  | 14              |

|       |   |   |   |   |   |   |   |   |   |   |     |     |
|-------|---|---|---|---|---|---|---|---|---|---|-----|-----|
| 9     | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 0 | 8   | 16  |
| 10    | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 0 | 0 | 8   | 16  |
| 11    | 0 | 1 | 1 | 0 | 1 | 1 | 1 | 1 | 1 | 0 | 7   | 14  |
| 12    | 1 | 0 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 9   | 18  |
| 13    | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 1 | 1 | 1 | 9   | 18  |
| 14    | 1 | 1 | 0 | 1 | 1 | 1 | 0 | 0 | 0 | 0 | 5   | 10  |
| 15    | 1 | 1 | 1 | 1 | 0 | 1 | 1 | 1 | 1 | 1 | 9   | 18  |
| 16    | 1 | 0 | 1 | 0 | 1 | 1 | 1 | 1 | 1 | 1 | 8   | 16  |
| 17    | 1 | 1 | 1 | 1 | 0 | 1 | 1 | 0 | 0 | 1 | 7   | 14  |
| 18    | 1 | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 1 | 1 | 9   | 18  |
| 19    | 1 | 0 | 1 | 0 | 1 | 1 | 1 | 1 | 1 | 1 | 8   | 16  |
| 20    | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 9   | 18  |
| Total |   |   |   |   |   |   |   |   |   |   | 156 | 312 |

Known:

$$\sum X_t = 156$$

$$\sum X_t^2 = 312$$

$$N = 20$$

$$K = 10$$

Asked :  $r_{11}$  ?

$$r_{11} = 0,32646$$

From the analysis above, the researcher found that the reliability of post test is 0,32646. Where N is 20 (df=19) and the level of significance is 5% the value of  $r_{table}$  is 0,361. So, this test is reliable because  $r_{value}$  is higher than  $r_{table}$ .

|             |                   |
|-------------|-------------------|
| $r_{value}$ | $r_{table} (5\%)$ |
| 0,32646     | 0,361             |

c. The Result of The Data

**Table 1**

**Students' Pre-test Score**

| No    | Name                     | Total | Score |
|-------|--------------------------|-------|-------|
| 1     | ACH.KHOMAIDI             | 3     | 30    |
| 2     | ACH.JUNAIDI              | 6     | 60    |
| 3     | ANIS SAROFAH             | 6     | 60    |
| 4     | ASRI BARIQOH AYU         | 4     | 40    |
| 5     | DEWI KARIMAH             | 3     | 30    |
| 6     | FITRIYAH                 | 4     | 40    |
| 7     | KHOTIBUL MAHBUB          | 3     | 30    |
| 8     | LASSETUL MAIQUNAH        | 6     | 60    |
| 9     | LIANA FITRI              | 5     | 50    |
| 10    | MOH.RONI                 | 4     | 40    |
| 11    | MOH.ARIFANDI             | 5     | 50    |
| 12    | M.SHOHIBUDDIN            | 3     | 30    |
| 13    | MOH.FAIZ MAULIDI         | 3     | 30    |
| 14    | ROMDLON ACH FAJAR SODIQI | 4     | 40    |
| 15    | ROFIKA YULIYANTI         | 4     | 40    |
| 16    | ULFA MARIYA              | 4     | 40    |
| 17    | WILDATUL HASANAH         | 4     | 40    |
| 18    | WAHIDATUN NIKMAH         | 7     | 70    |
| 19    | YUSROTUL HASANAH         | 5     | 50    |
| 20    | LAYLI MUSARROFAH         | 7     | 70    |
| Total |                          | 90    | 900   |

From the data above, it shows that of the 20 students the lowest pretest score was 30. While the highest score was 70. The score of 30 was 5 people. Score 40 7 people. Score 50 3 people. Score 60 3 people. Score 70 2 people.

**Table 2**  
**Students' Post Test Score**

| No | Name                     | Total | Score |
|----|--------------------------|-------|-------|
| 1  | ACH.KHOMAIDI             | 6     | 60    |
| 2  | ACH.JUNAIDI              | 7     | 70    |
| 3  | ANIS SAROFAH             | 9     | 90    |
| 4  | ASRI BARIQOH AYU         | 8     | 80    |
| 5  | DEWI KARIMAH             | 9     | 90    |
| 6  | FITRIYAH                 | 7     | 70    |
| 7  | KHOTIBUL MAHBUB          | 7     | 70    |
| 8  | LASISETUL MAIQUNAH       | 7     | 70    |
| 9  | LIANA FITRI              | 8     | 80    |
| 10 | MOH.RONI                 | 8     | 80    |
| 11 | MOH.ARIFANDI             | 7     | 70    |
| 12 | M.SHOHIBUDDIN            | 9     | 90    |
| 13 | MOH.FAIZ MAULIDI         | 9     | 90    |
| 14 | ROMDLON ACH FAJAR SODIQI | 5     | 50    |
| 15 | ROFIKA YULIYANTI         | 9     | 90    |
| 16 | ULFA MARIYA              | 8     | 80    |
| 17 | WILDATUL HASANAH         | 7     | 70    |
| 18 | WAHIDATUN NIKMAH         | 9     | 90    |
| 19 | YUSROTUL HASANAH         | 8     | 80    |
| 20 | LAYLI MUSARROFAH         | 9     | 90    |
|    | Total                    | 156   | 1560  |

From the table above, it shows that of the 20 students the highest post-test score was 90. While the lowest score was 50. The score of 50 was 1 person. Score 60 1 person. Score 70 6 people. Score 80 5 people. Score 90 7 people.

**B. Analysis of The Data**

After the instrument (pre-test and post test) is declared valid and reliable, the researcher needs to analyze the score, as follows:

**Table 5**  
**Data Analyzis**

| Respondents | Pretest | Post Test | D | D <sup>2</sup> |
|-------------|---------|-----------|---|----------------|
|-------------|---------|-----------|---|----------------|

|            |              |              |            |              |
|------------|--------------|--------------|------------|--------------|
| 1          | 30           | 60           | -30        | 600          |
| 2          | 60           | 70           | -40        | 1600         |
| 3          | 60           | 90           | -30        | 600          |
| 4          | 40           | 80           | -40        | 1600         |
| 5          | 30           | 90           | -60        | 3600         |
| 6          | 40           | 70           | -30        | 600          |
| 7          | 30           | 70           | -40        | 1600         |
| 8          | 60           | 70           | -10        | 100          |
| 9          | 50           | 80           | -30        | 600          |
| 10         | 40           | 80           | -40        | 1600         |
| 11         | 50           | 70           | -20        | 400          |
| 12         | 30           | 90           | -60        | 3600         |
| 13         | 30           | 90           | -60        | 3600         |
| 14         | 40           | 50           | -10        | 100          |
| 15         | 40           | 90           | -50        | 2500         |
| 16         | 40           | 80           | -40        | 1600         |
| 17         | 40           | 70           | -30        | 600          |
| 18         | 70           | 90           | -20        | 400          |
| 19         | 50           | 80           | -30        | 600          |
| 20         | 70           | 90           | -20        | 400          |
|            | 900          | 1510         | -690       | 26300        |
| $\Sigma N$ | $\Sigma X_1$ | $\Sigma X_2$ | $\Sigma D$ | $\Sigma D^2$ |

From the table above it can be seen that all students experience an increase in understanding proved by an increase in the test score given by the teacher.

Known:

$$N = 20$$

$$\Sigma X_1 = 900$$

$$\Sigma X_2 = 1510$$

$$\Sigma D = -690$$

$$\Sigma D^2 = 26300$$

Asked :  $t_{\text{value}}$  ?

$$\text{So : } MD = \left| \frac{\Sigma D}{N} \right|$$

$$MD = \left| \frac{-690}{20} \right|$$

$$MD = 34,5$$

$$t = \frac{MD}{\sqrt{\frac{SD}{(N-1)}}}$$

$$t = \frac{MD}{\sqrt{\frac{\frac{\sum D^2}{N} - \left(\frac{690}{N}\right)^2}{(N-1)}}}$$

$$t = \frac{34,5}{\sqrt{\frac{\frac{26300}{20} - \left(\frac{-690}{20}\right)^2}{(20-1)}}}$$

$$t = \frac{34,5}{\sqrt{\frac{1.315 - (34,5)^2}{19}}}$$

$$t = \frac{34,5}{\sqrt{\frac{1.315 - (34,5)^2}{19}}}$$

$$t = \frac{34,5}{\sqrt{\frac{1.315 - 1.190,25}{19}}}$$

$$t = \frac{34,5}{\sqrt{\frac{124,75}{19}}}$$

$$t = \frac{34,5\sqrt{19}}{\sqrt{124,75}}$$

$$t = \frac{34,5 \times 4,358}{11,169}$$

$$t = \frac{150,351}{11,169}$$

$$t = 13,46$$

From the analysis above, it is known that the  $t_{\text{value}}$  of pretest and post-test, the effectiveness of visualization strategy in teaching reading at seventh Grade of SMP Islam Riyadlatul Mubtadiin Tlonto Ares Waru Pamekasan is 13,46.

### C. Hypothesis Testing

Hypothesis testing is needed in quantitative research. The researcher has written in chapter three, if the  $t_{\text{value}}$  is higher than  $t_{\text{table}}$  ( $t_{\text{value}} > t_{\text{table}}$ ) it means that the alternative hypothesis ( $H_a$ ) is accepted, but if the  $t_{\text{value}}$  is lower than  $t_{\text{table}}$  ( $t_{\text{value}} < t_{\text{table}}$ ) means that the alternative hypothesis ( $H_a$ ) is rejected.

The researcher uses the alpha significance 5% used in educational research as follow:

$$df = N - 1$$

$$df = 20 - 1$$

$$df = 19$$

| df | level of significance |       |
|----|-----------------------|-------|
|    | 5%                    | 1%    |
| 19 | 2,045                 | 2,462 |

### D. Discussion

Based on the findings of the data obtained by the researcher, it appears that the students taught using visualization strategies have more achievements in reading learning than before using visualization strategies on teaching reading at

the seventh grade of SMP Islam Riyadlatul mubtadiin Tlonto Ares Color Pamekasan.

The result of data analysis shows that  $t_{\text{value}}$  is higher than  $t_{\text{table}}$  ( $13,46 > 1,729$ ) with the level of significance is 5% and the total respondents are 20 students ( $df = 19$ ). According to the result of the data and what William Lee Hays stated that statistical significance is a statement about the likelihood of the observed result, nothing else. It does not guarantee that something important, or even meaningful, has found.<sup>2</sup> The researcher can conclude that visualization strategy is effective in teaching reading at seventh grade of SMP Islam Riyadlatul Mubtadiin Tlonto Ares Waru Pamekasan.
