

CHAPTER IV

CONCLUSION AND SUGGESTION

The researcher present the conclusion and suggestion dealing with the result and discussion that has been discussed in the previous chapter. The conclusion summarizes and answers of research focus. The suggestion as to the follow-up the finding is addressed to the next researcher, readers, and The State Islamic Institute (IAIN) Madura.

A. Conclusion

In this section, the researcher divides the answers into two parts:

- 1) Types of communication found in crazy rich Asian novels
 - a) Communication based continuity which includes direct communication and indirect communication.
 - b) Communication based on the scope which includes internal communication (vertical communication, horizontal communication, and diagonal communication), and communication based on the number of communicating (individual communication, group communication).
- 2) Character respons to the different type of language communication

The character's response to the differences in communication in the novel Crazy Rich Asian is that there are those who are normal in responding to the differences in communication that occur and some who don't like the differences in communication used, so it can be concluded

that how the characters' responses to differences in communication are different, there are those who show their dislike and there are also those who show an ordinary response to the differences in communication used.

From the two responses that can be found from the responses of the characters in the Crazy Rich Asian novel to the difference in communication language, there are more mediocre responses or no problem with the differences in the language of communication that occur, it means that it can be concluded that the differences in the language of communication that occurs in the novel Crazy Rich Asian does not become a big influence in communication for the characters in Crazy Rich Asian novels.

B. Suggestion

Based on the conclusion above, the researcher wants to give some suggestion to the next researcher, they are:

1. For the next researcher

This research can give new experience to the next researcher about derivational affixes knowledge, and also can be as comparison source to the other source.

2. For the collage students

The researcher hopes this research can give the students information or knowledge about derivational affixes and the kinds of it especially for English Department.

3. For the State Islamic Institute (IAIN) Madura

The result of this research will be contributing to the library of State Islamic Institute (IAIN) Madura that can be as reference and discussion lessons for the collage students.
